

Dandi-Block! The concrete alternative you'll love

Another great reason to use our Dandi-Block!

Our Dandi-Block is made of polyethylene and it doesn't conduct electrical current that goes through the ground like concrete does. Stray current that goes through the ground will enter your LP tank through concrete blocks and is a large contributor to corroding the tank and any of the piping that is connected to the tank. The Dandi-Block ultimately extends the life span of the tank with less money out of your pocket in maintenance.

DANDI-BLOCK

WB Sales, Inc.

**Buyer & Distributor of
New Used & Refurbished LP Tanks**

**When it comes to buying and selling storage tanks,
call the experts! WB Sales, Inc. Toll Free: (877) 515-1212**

What people are saying about our Dandi-Blocks:

- Didn't think I would like them, but now it is the only block I will use
- Makes my competitor look like they are in the stone age
- I save enough using Dandi-Block because it doesn't put dents in my truck and tailgate
- I use Dandi-Block as a selling tool to get new customers, works every time
- My tanks are my most important asset so I put them on Dandi-Blocks
- My employees like setting tanks with the light weight Dandi-Block
- The tank set looks so nice when I leave compared to concrete blocks
- Don't care what they cost; I'm going to buy them one time in my lifetime
- It's about time someone came up with something lighter & easy to handle
- The tank set looks so pleasing to the eye compared to those using a tank and concrete block
- I think I lost every finger nail on my hands at least 3 times because of concrete blocks
- I can set tanks for another 10 years with the light weight of Dandi-Block

**We're looking for all size of LP tanks!
120 gallon ASME tank to 90,000 gallon
storage LP tanks.

Protect your most important asset in the field!

Another great reason to use our Dandi-Block! It is made of polyethylene and it doesn't conduct electrical current that goes through the ground like concrete does. Stray current that goes through the ground will enter the tank through concrete blocks and is a large contributor to corroding the tank and any of the piping that is connected to the tank. This ultimately extends the life span of the tank and less money out of your pocket in maintenance.

MODEL 22626 will accommodate 20 lb. up to 420 lb. vertical tanks. It's light weight and will not break if dropped. Use over and over again. Doesn't hold moisture, helps prevent rusting on the foot ring of the tank.

MODEL 31717 is designed for the 100# vertical cylinders. Its unique design will allow you to place the block/cylinder closer to buildings & multiple cylinders

MODEL 71130 is designed for horizontal ASME tanks up to 1,000 gwc. It measures 7 inches high with a base measurement of 11 inches by 30 inches. Model 71130 requires only one block for each end of the tank. This block will lift the tank far enough off the ground to allow for tank painting, mowing, trimming, and other maintenance as needed.

MODEL 51026 is designed for horizontal ASME tanks up to 500 gwc. It measures 5 inches high with a base of 10 inches by 26.5 inches. Model 51026 requires only one block for each end of the tank. this block will lift the tank far enough off the ground to allow for tank painting, mowing and other maintenance as needed. - Green in color
